Niraj Shaw

Automation Software Test Engineer || Ex- Cognizant || Python || Java || Selenium || TestNG || BDD Cucumber || GenAI in Testing || Jmeter || Rest Assured || Postman || AWS || Docker || Jenkins || GitHub || US Healthcare

Kolkata, West Bengal, India

Summary

I have 4+ years of experience in Automation software testing, with strong expertise in Selenium (Java/Python). I build reliable, maintainable automation frameworks from scratch using Page Object Model, Data-Driven, and Hybrid approaches. My experience spans US Healthcare and E-commerce domains, covering the full testing cycle including UI automation, API testing, performance testing, and CI/CD integration.

Core Technical Skills:

- UI Automation: Selenium WebDriver, Selenium Grid, TestNG, Cucumber (BDD)
- API Testing: Postman, REST Assured, Swagger
- Performance Testing: Apache JMeter
- DevOps / CI-CD: Jenkins, GitHub Actions, Docker, Maven
- Languages: Java, Python, SQL
- Test Management: JIRA, Redmine, Git
- Manual Testing: Test Scenarios, Test Cases, RTM, Test Reports
- Cloud/Infra: Basic AWS, VM-based testing environments

Domain experience:

- US Healthcare: Risk, Quality, browser extension testing, EHR validation, and AI agent behavior/output testing
- E-commerce: Checkout, cart, payment, delivery, inventory, order flow, promotions, coupons, returns, and refund-related flows
- AI Agent (US Healthcare): AI agent workflow, prompt validation, response accuracy, output behavior, PHI/PII handling, escalation flow, EHR interaction, and healthcare compliance testing.

Key Contributions:

- Built advanced Selenium frameworks with Swing, cross-browser support, regression and smoke test handling, Report generation, Execution time, execution Logs and CI/CD hooks via Jenkins and Docker.
- Automated 80% of repetitive test cases using Selenium with Java and TestNG, reducing testing time by 40%.
- Contributed to the successful launch of multiple mobile applications live on Play Store and Apple store, achieving 95% + test coverage and seamless user experience.
- Authored over 500 detailed test cases and scenarios, achieving a 95% success rate in defect detection during the first testing cycle.
- Received recognition for improving team productivity by mentoring junior

QA engineers in automation and testing best practices.6. Tested AI agent behavior and outputs to ensure accuracy, reliability, and consistent performance across different scenarios.
